SUMMARY

I am currently undergraduate student at UC Riverside experienced in front-end development, Java, and C++ programming. I am also familiar with some Linux command, Unit Testing, and Integration Testing.

EDUCATION

University of California, Riverside
B.S. Computer Science
Expected Dec 2020

SKILLS

Front-End
HTML, CSS, SCSS, JavaScript, React.js

Object Orientated Languages
Java, C++

Methodologies
Agile, OOP, Functional

Tools
Git, Vim, Figma, Visual Studio Code

PROJECTS

GSI Travel Sdn Bhd
Front-End Developer August 2019 - Present
Updating a static website into using React.js reusable component and redesigning web layout to improve user's experience.

Hack Davis 2019
Full-Stack Developer February 2019
Built a web app to help owners identify their pet's breed and output a common health disease using React.js, Firebase, and Google's Cloud Vision API.

Cruz Hacks 2019
Back-End Developer January 2019
Built a productivity web app. Worked on utilizing socket.io to communicate with React to upload user's data to the server.

COURSEWORK

- OOP Methodologies
- Intermediate Software Design
- Advanced Data Structures & Algorithms
- Software Construction
- Discrete Structures
- Linear Algebra & Differential Equations
